Amendments to the Claims:

Please amend claims as follows:

1. (Original) A multimer protein molecule comprising at least a first amino acid sequence having substantially the sequence of one of the *Parietaria judaica* major allergens Par j 1 or Par j 2 and a second amino acid sequence having substantially the sequence of one of the *Parietaria judaica* major allergens Par j 1 or Par j 2.
2. (Original) The multimer protein molecule according to Claim 1 further comprising at least a third sequence of one of the *Parietaria judaica* major allergens Par j 1 or Par j 2.
3. (Currently Amended) The multimer protein molecule according to Claim 1 ~~or 2~~, wherein the sequence of the major allergen Par j 1 is substantially the sequence Seq Id No. 1 and the sequence of the major allergen Par j 2 is substantially the sequence Seq Id No. 3.
4. (Currently Amended) The multimer protein molecule according to Claim 1 ~~or 2~~, wherein the sequence of the *Parietaria judaica* major allergen Par j 1 and/or of the major allergen Par j 2 is mutated in the loop 1 amino acid region, substantially comprising from amino acid 1 to 30 of Seq Id No. 1 and/or of Seq Id No. 3.
5. (Original) The multimer protein molecule according to Claim 4, wherein the mutated sequence of the major

allergen Par j 1 is substantially the sequence Seq Id No. 2.

6. (Original) The multimer protein molecule according to Claim 4, wherein the mutated sequence of the major allergen Par j 2 is substantially the sequence Seq Id No. 4.

7. (Original) The multimer protein molecule according to Claim 4, wherein the mutated sequence of the major allergen Par j 1 is substantially the sequence Seq Id No. 2 and the mutated sequence of the major allergen Par j 2 is substantially the sequence Seq Id No. 4.

8. (Currently Amended) A nucleic acid that encodes the multimer protein molecule according to ~~one of the above~~ claims 1.

9. (Original) A recombinant vector for expression in prokaryotic cells comprising, under the control of a suitable transcription promoter system, the nucleic acid according to Claim 8.

10. (Original) A recombinant vector for expression in eukaryotic cells comprising, under the control of a suitable transcription promoter system, the nucleic acid according to Claim 8.

11. (Currently Amended) The multimer protein molecule according to ~~one of claims 1 through 7~~ for medical use.

12. (Currently Amended) The multimer protein molecule according to ~~one of~~ claims 1 ~~through 7~~ for medical use as a hypoallergenic agent.

13. (Currently Amended) A pharmaceutical composition comprising an effective and acceptable amount of the multimer protein molecule according to ~~one of~~ claims 1 ~~through 7~~ and suitable adjuvants and/or diluents.
